## HAD BRILLIANT CAREER

DISTINGUISHED SERVICE OF NEW

JAPANESE AMBASSADOR.

Viscount Aoki, who comes as the first ambassador from Japan to the United States, has had a distinguished career in the diplomatic service, from which he retired about six years ago, when he was called by the emperor to be one of the privy councilors, the highest honor that can be hoped for by the nobility. When yet a young man the new ambassador went to Germany as a student and received there training in the large universities. Twice he was returned there as minister. Naturally, German is the language with which he is most familiar, but he speaks English readily.

It is expected that as soon as the formal approval of his selection by the government of the viscount, accompanied by the viscountess, who is of German birth, the viscount having met and married her in Germany, will come to this country without delay. It is believed here that the Japanese government will purchase an embassy building in this city, more conveniently located than is the present legation. Viscount Aoki is about sixty years old and is a man of great ability. Before entering the privy council he was twice minister for foreign affairs, and Mr. Aoki, who is now here, served under him as vice minister.

## FOR THE LIGHTSHIP MEN.

Positions Provided—They May Be Reimbursed for Losses.

Upon recommendation of the lighthouse board the Department of Commerce and Labor has increased the pay of Charles I. Gibbs, master of the lighthouse tender Azalea, from \$150 to \$175 a month, to date from December 10, 1905, the date on which he, by his "promptness, energy and good seamanship," succeeded in reaching the Nantucket shoal light vessel No. 58 during very heavy weather in the district, in the thirteen persons on board the lightship sank.

Of the four officers of light vessel No. 58 the master, Jorgensen, has been offered a temporary position on a lighthouse tender as second mate at \$80 a month. The mate, Mr. Acorn, now employed on a lighthouse tender, and before long will go to fill a vacancy on the Charleston (S. C.) light vessel. The second engineer, Mr. John E. Luby, will be employed as engineer on a lighthouse tender in the Gulf of Mexico or some other lighthouse vessel.

The prospect of the second district has been directed to employ the six men of the crew of light vessel No. 58 on lighthouse vessels in the district, if they occur, in preference to employing new men.

The inspector also has been directed to send as soon as possible affidavits from the officers and men of light vessel No. 58, stating the value of their effects lost when their vessel foundered, and when received Congress will be asked to reimburse them therefor.

The three wireless telegraph operators of light vessel No. 58, who were killed in the navy, and they are now out again on the station at Nantucket shoals, on light vessel No. 58, which took the place of the one that was lost, have been asked by Congress to be asked for \$100,000 to build a new light vessel to take the place of No. 58.

## DEATH OF GEORGE FREER.

Fatal Result of Injuries Received at Agricultural Department Yesterday.

George Freer, the young man who accidentally stepped into the elevator shaft in a building occupied by the Agricultural Department at 221 Linworth place southwest yesterday afternoon and was so severely injured, as stated in yesterday's Star, died at the Emergency Hospital this afternoon. He lived only a few hours from where the accident occurred. Coroner Nevitt was notified of the death of the young man, and gave permission to Undertaker William Lee to remove the body from the hospital and prepare it for burial. An investigation of the affair will be made before the coroner, and he will give the necessary death certificate.

## CANNOT LAY LARGER MAIN.

Commissioners Not Able to Increase Water Pressure at Old Observatory.

Acting upon a request recently made by Surg. Gen. E. M. Rixey, U. S. N., for the installation of a larger water main in the vicinity of the United States Naval Medical School, at 24th and F streets northwest, Commissioner Biddle yesterday stated that the funds of the water office are in such depleted condition that it will not be possible to do the desired work in a year or two. In calling the matter to the attention of the Commissioners Surg. Gen. Rixey included a report made by the medical director in command, in which he stated that the water pressure at the school was inadequate for fire protection.

## HISTORIANS IN SESSION.

Second Meeting Opened at Baltimore Today—Papers Read.

BALTIMORE, Md., December 27.—The second session of the combined annual meeting of the American Historical, American Economic, American Political Science associations and the Bibliographical Society of America opened at the Johns Hopkins University today. The attendance was large.

The historical association's meeting was presided over by President Frank W. Taussig of Cambridge, Mass. The first paper read was that by Prof. St. George L. Stoussart of the University of the South, whose address dealt with "Virginia and the English Colonial System." This was followed by a paper by Prof. Charles L. Raper of the University of North Carolina, who discussed the question of "Why North Carolina at First Refused to Ratify the Federal Constitution." Other addresses which formed the morning session of interest topics were "Chief Justice Marshall and the Virginia Supreme Court," by Prof. William E. Dodd of Randolph-Macon College, and "The Savings Bank," by Walter L. Fleming, associate professor in the University of West Virginia. The closing address of the morning session was delivered by Prof. William A. Dunning of Columbia University. He spoke of "The Second Birth of the Republican Party."

The Economic Association held its opening session in the same building and the members were welcomed by Prof. Ira Remsen, president of the Johns Hopkins University, before proceeding to a discussion of the economic theory, which was introduced by Prof. Jacob H. Hollander of Johns Hopkins.

Following Prof. Hollander's paper there was a general discussion of the question, introduced in by John B. Clark of Columbia University; William M. Burke, Albion College; Charles A. Tuttle, Washburn College; Roswell E. French, University of Illinois; Frank A. Fetter, Cornell University; and Simon N. Patten, University of Pennsylvania.

During the progress of these two meetings in McCoy Hall the Political Science Association was in session in the physical laboratory, the morning being given over to a discussion of the suffrage conditions in the south. Addresses were made by Prof. E. B. Hart of Harvard, who looked at the question from the political viewpoint, and John C. Rose, United States district attorney of this city.

John McCarthy, undertaker, died at Syracuse, N. Y., yesterday, aged fifty-nine years. He was known throughout the country as an enthusiastic democrat. In 1884 he bet everything he possessed, even his house, on Grover Cleveland. He was a warm supporter and personal friend of William J. Bryan.

B. F. Yeakum, executive head of the Rock Island and Frisco system, has denied the recent report that the "Frisco" is seeking an outlet to the south Atlantic seaboard. "The Frisco has not purchased or contemplated purchasing any line from Birmingham to the gulf," he said. "You may say that the Frisco will not be extended in that direction."
